

**Mrs. Ivankovits**

## **Summer Math Assignment 2021**

### **Incoming 6th grade Students**

The summer homework for 6th math students is required. I ask that you complete the IXL skills below and work to a Smart Score of at least 90%. Based on what you've learned in 5<sup>th</sup> grade, the skills I would like you to focus on this summer on ixl.com are from Grade 6:

- Whole Numbers (skills A.6 - A.7)
- Multiplication (skills B.2 - B.7)
- Division (skills C.2, C.3, C.5)
- Number Theory (skills E.3 - E.11)

These are skills you have seen before. When we return to school, I will record your scores and award up to 5 bonus points to be used on a test during the first trimester. If you have any questions or concerns, please contact me at [class6a@stjaneschool.com](mailto:class6a@stjaneschool.com) after July 1st 2021.

These skills are due on the first day of school in August, no exceptions. Good luck! I look forward to seeing you in August!

**God Bless You!**
